Optimism Expressed For FUN Show
Strong Finish For 2001 CCDN Coin Market Index

The new year begins optimistically for the sight-unseen rare coin market. This follows a very successful 2001 for most dealers. All but two of the indexes that we regularly monitor and report are up (see chart inset). Dealers are hopeful that the market will continue to be strong this year with prices generally increasing. They know that a shortage of material will be the ultimate problem as they look to buy coins from as many different sources as they can find. The ability to find and buy rare coins will be very important in 2002. To this end, we may see an increase in the number of dealers participating in the sight-unseen market via the electronic dealer networks. Those dealers that have participated in 2001 know that, more often than not, they have been very satisfied with their purchases. Buying sight-unseen usually means lower expectations than when buying sight-seen. Yet, most of the dealers that we talk with have been very happy with the overall quality of the coins that they have bought sight-unseen. Sometimes they are even very pleasantly surprised. If the shortage of material drives more dealers towards the sight-unseen arena then competition may push Bids even higher.

The demand for material is so strong that it is forcing more dealers to explore different areas of the market for value. This week, you will notice some very strong activity and increased **sight-unseen** Bids taking place for PCI professionally graded and slabbed coins. This is one of those areas of the market that dealers believe to represent value. Increased Bids, mostly in MS65, have been placed for a cross section of material found in PCI holders. Those dealers who are satisfied with the general quality of the product are willing to pay strong money to buy coins for their expanding customer base. Consequently, this segment of the sight-unseen market has begun the new year on a strong note. If the dealers Bidding for this material are successful, it may lead to increases for additional areas of the market that have remained quiet for some time.

The new year also will begin in earnest as the Annual Florida United Numismatists Convention and Show in Orlando will dominate the market January 10-13. Dealers will try to fill some of their needs at this show and public auctions. Activity is usually strong at this show and expectations this year are running high. First-up for dealers will be The "Elite" Sale conducted by Superior Galleries on January 9 in Orlando. We have listed a few of the certified highlights from this auction.

After completing a very strong 2001, the General Services Administration Carson City Morgan Dollars are off to a good start in 2002. Bids are higher, hoping to entice holders of these popular coins to part with a few. The demand has spread to virtually all GSA "CC" dates forcing small increases. Of course, those issues that sport gem coins in these holders can command much stronger prices. The demand for GSA Dollars is a small part of the big picture which points to strong demand for Carson City coins of all denominations. Plus signs are also seen scattered among the Silver Commemoratives. Several of these issues moved higher in 2001 and begin the new year on an optimistic up-tick. Quality is still very important as demand is strongest for those Commems grading MS65 and better. The market for Mint State and Proof Type continues to display some discounting as we begin the new year. However, this segment of the rare coin market remains very strong with buyers on the sidelines waiting for an entry point. Dealers know that Type is always a necessary part of their inventory and it also comes in handy when funds need to be raised quickly.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Silver Commemoratives Stay Hot
Dealers Having Winter FUN In Florida

Florida is the very center of the numismatic world this week as auctions and shows are receiving the attention of many dealers. Obviously, the Annual Florida United Numismatists Convention is the highlight with dealers actively trading rare coins with each other. Dealers say that their customer's want lists continue to grow, even during these uncertain economic times. Many of their customers are seeking rare coins as a way to diversify their financial portfolios as a precaution against financial collapse. The increase in volatility among all markets has been experienced over the last few years. Demand for material is growing and dealers are finding out that the road that leads towards easy deals is rather rough. Dealers have to work harder on the buying end. They know that they need to be more competitive and Bid aggressively if they are to be very successful in today's frenzied buying environment. Still, patience is necessary because they know that it takes ready funds to buy deals and special coins when they become available. Consequently, dealers have been "blowing out" some material to have the funds ready to buy additional material to supply their growing customer base. These quick sales appear on our **sight-unseen** sheets as discounting. However, it is important to remember that this discounting usually results in a completed transaction, one that has another dealer on the buying side of the transaction. Therefore, we remain in the throws of a bullish market with strong demand and steadily advancing prices as we begin 2002.

This market is also beginning to receive additional fuel for its demand from the precious metal's arena. It is becoming increasingly evident that both Silver and Gold have vaulted out of their narrow trading range to new, higher plateaus. Silver has improved steadily since late November when Spot was $4.03 as it now stands at $4.70 per ounce. However, Gold is also doing well crossing the $280 per ounce mark. Increases in these precious metals may result in increased prices for many generic Silver and Gold issues. In turn, the increasing intrinsic value of common Gold and Silver coins can spark greater interest in collecting **rare** coins. It also means that dealers may find that the demand for material will be even greater as we move forward.

This week, the sight-unseen market continues to receive many supporting Bids for a wide range of rare coins. Silver Commemoratives have been strong over the past few months and that strength is continuing this week. During the last three months Bids for many Silver Commemorative issues have soared by as much as 46% (see chart center). This week, dealers are forced to increase their Bids once again, trying to get their hands on several issues for customers. The popularity of Silver Commems is growing. It makes sense when you consider that buyers are able to receive a quality coin at an affordable price. Increases are seen in a wide range of Mint State grades. Morgan and Peace Dollars are another segment of the market that continues to be the beneficiary of these supporting Bids. We also see a number of dealers increasing their Bids for select dates from these series. These slight Bid increases have been placed in an effort to attract enough coins to satisfy the current demand. Also, the increases tell us that several semi-key dates are especially in short supply. Dealers are actively looking to buy dates such as the 1878 7/8 Tail Feathers; 1879CC; 1881; 1886S; 1896O; 1900O/CC; 1921; and, 1934S. You can easily see by this short list that collector coins are very badly needed. Proof Singles is another area that is prospering as we begin 2002. There are some plus signs present on our charts but the real story is the continuing strong demand for Proof Singles. Most Bids remain in place as dealers try to buy some of these beauties for their customers.

The "Elite" Sale conducted by Superior Galleries realized just under $1 million at $994,750 in Orlando, FL. The January 9 sale of **just** 388 lots brought a considerable amount of interest. We have listed a few of the certified highlights.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Ups And Downs For Sight-Unseen Market
Record Prices Established At NYC Auction

Dealers are getting back from the Annual Florida United Numismatists Show and Convention in Orlando with want lists still left unfulfilled. There was plenty of activity at this show and surrounding public auctions but the need for material is still very much evident. Demand for rare coins is strong as dealers see an expanding collector base take on greater importance as we begin 2002. Dealers point to great enthusiasm seen by collector/investors who participate at public auction. However, the lack of material continues to plague an ever hungry market. Some dealers Bidding in the sight-unseen rare coin market believe that this market is getting stronger. They admit that it is getting difficult to find material and some believe that it is getting nearly impossible to find enough material to satisfy the current demand. Consequently some dealers think that Bid increases will not only continue but intensify. Also, dealers continue to be pleased with the majority of the rare coins that they buy **sight-unseen**. Actually, some say that approximately 80 percent of the coins bought sight-unseen are average to slightly above average in quality. Of course they sometimes "catch a mistake" and they have to "eat-it," but generally they are happy trading coins sight-unseen. Nonetheless, we continue to see some discounting occurring in several areas of the market as dealers continue to blow-out some material that has been sitting around for too long. Also coins that are bought right, purchased way below current levels are ripe for selling at a discount. Quick profits are important for any business and also helps with its cash flow. This week we see some of that discounting taking place in Proof Type, Mint State Type, Gold Commemoratives, Walking Liberty Half Dollars and Mercury Dimes. You should easily recognize some of these areas of the sight-unseen market that have been strong during the past year. Naturally dealers are compelled to sell at a profit to raise funds, especially if they have no current buyer available. Finally, it is important to point out that discounting sometimes has a way of strengthening a particular market. As a new lower Bid/Ask takes shape we may begin to see some more interest in those areas by individuals that now see good value at the newer levels.

Today we are seeing dealers willing to step-out and offer strong sight-unseen Bids for coins that they can readily place with customers. New buyers are entering the market with cash-in-hand and a willingness to buy select rare coins. Dealers are frantically trying to fill these want lists and complete the transaction before someone else does. Key and semi-key date coins seem to be at the forefront of this demand. Sophisticated, knowledgeable collector/investors are willing to buy, but they want the better dates and they want them in the higher grades. We have watched the Bids increase throughout most of last year for key and semi-key date Buffalo Nickels. This trend is continuing today with Bids advancing again for the better dates of the series. Quality is seen in combination with rarity as plus signs dot our chart in MS64 thru MS66. Proof Singles are also doing well with plus signs targeting the Proof Buffaloes. Still some discounting is also seen in the Proof Singles chart as well. Weakness is also evident in Peace Dollars, mainly hitting the common dates in MS65. Morgan Dollar common dates remain flat with a few minus signs continuing to plague these issues. Gold Commems have finally succumb to discounting. Minus signs are found in the Gold Commems after a very strong 2001. Decreases are mainly seen for Gold Commems in the Gem MS65 grade. Walking Liberty Half Dollars has select dates in the minus column this week. This series is similar to the Gold Commems with some profit taking following a strong 2001. Mercury Dimes continue its lackluster performance except for a few plus signs seen for select key dates.

Stack's Americana Sale of 2,110 lots realized more than $6.789 million for the first two sessions with several record prices established. The January 15-17 auction was held in New York. It featured the Hain Family collection. A record price of $207,000 was seen for an Extremely Fine Noe 2-A Willow Tree Shilling. Also, a BU 1792 Silver Centered Cent claimed another record price at $414,000.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

How Did Smythe Get Double and Triple Greysheet for Many of the Certified & Uncertified Coins in Our Nebraska IV Sale?

The following 16 coins are highlights from a recent R.M. Smythe Coin auction held at the Algonquin Hotel in New York City. The "Nebraska Part IV" (along with other major consignments) set numerous records as bids were often shouted from the auction room floor. Phone bids that came from as far as California were also executed during the 8-hour, 1,070-lot sale.

HOW DID WE DO IT? It wasn't easy. We carefully catalogued every coin, illustrated the feature items using digital photography, and showed the lots in New York. We made the dealers and collectors who came to the auction feel right at home, and we provided telephone bidding for those who couldn't be there in person. Our buyer's charge is still just 10%.

Photocopying *CDN publications* is unethical, dumb, illegal & *totally unnecessary!*

Photocopying any of our CDN publications is unethical; after all, selling newsletters is our livelihood, just as selling coins is yours. We know that you wouldn't tolerate someone reaching into your case and removing an MS65 Morgan without paying for it, but that is exactly what making photocopies of our copyrighted publications does to us. Besides, you don't really want to let your customers see you using illegal copies — it sends them a clear message that you aren't willing to play by the rules, and that is definitely not good for customer relations. And it's never a good idea to taint a relationship based on trust with 'evidence' of wrongdoing.

We also recognize that many dealers need more than one copy. Well, we have just made life a lot easier for dealers to do the fair and legal thing, with *serious* discounts on multiple subscriptions mailed to the same business address.

Not to mention the example that you might be setting for your staff and customers.

Send your check today, and we'll take care of all the details.

This is our livelihood, just as selling coins is yours.

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XVII No. 4 January 25, 2002 Single copy price $4.00

Proof Singles Sought-After Select Areas Of Market Softening

The sight-unseen market is mixed as dealers continue the trend established during the latter part of last year by discounting select rare coins. These coins are being discounted primarily through the large number of public auctions that is common to the beginning of each new year. Dealers consign material that they are looking to "blow out" when the need for available funds becomes a priority. Besides auctions, dealers offer select coins sight-unseen at very attractive prices to raise cash quickly. Consequently, there is a lot of activity taking place in the market as some dealers try to redirect their strategy and adjust their inventories to meet their customer's needs as well as today's demand. As a result, minus signs are beginning to appear in several sectors of the coin market. These minus signs are combining with many plus signs reflecting continued market strength to equal today's **mixed** sight-unseen market. Still, the overall market sentiment remains **optimistic** as dealers try to buy material for their business endeavors.

Commemoratives are considered a good indicator of collector and collector/investor strength. The action that we see taking place in the Silver Commemorative market is a good example of the strong demand and of the mixed nature of the market. You will notice that our Silver Commem chart is displaying scattered minus signs for both PCGS and NGC certified rare coins. However it is also sporting select plus signs as well. Dealers tell us that the Silver Commem series is experiencing sustained demand by collectors. Many of these collectors are looking to upgrade their sets when an opportunity presents itself. Also, dealers are discounting some high-grade Commems that haven't sold to free-up some cash for other, more desirable examples. Gold Commems are flat this week with even a few minus signs appearing. Seeing minus signs among the Gold Commems has been a rare occurrence. We still see dealer Bids supporting Gold Commems currently but not to the degree that we had been accustomed to last year.

Weakness still has a grip hold on the Mercury Dime series. There are a few more minus signs appearing this week. We have seen many major collections hit the market over the last couple of years. These collections had coins that were considered to be among the finest known. Therefore, a glut of quality Mercs had to be absorbed contributing to the market weakness. While a great amount of attention is paid to those Mercs with Full Split Bands, some astute dealers have been able to buy gem specimens without FSB's very reasonably. This series, like the Morgans is waiting for new collector/investors to enter and put a charge in it. We believe that Morgan Dollars are currently one of the softer areas of the market. That's because a number of significant collector/investors have left this market. The consequence of their leaving means that few remain to Bid the very strong levels we have seen. Discounting from weak auction sales has taken its toll on this market. We also notice that a few dealers are taking advantage of the opportunity and buying select dates. The result is seen by some plus signs appearing. Type is clearly the chosen segment representing a mixed market. Both Mint State and Proof Type have been the recipient of a host of minus signs. Naturally, this area allows dealers to sell a few coins to raise a lot of money. Still the Type markets are healthy (note the plus signs), with many collector/investors participating. Mint State Gold Type is lackluster to weak reflecting the mood of the Gold bullion market. Please remember that the volatile nature of the precious metals market could change in an instant.

Proof Singles are still an extremely active area of the market. Clearly, the demand for select Proof Jefferson Nickels, Mercs, Walking Liberty and Kennedy Half Dollars is evident. Many new collectors continue to work at completing their modern sets. To this end these "early" Proofs are an important part of their mission. Business strike Walkers are also popular and in demand today. Dealers are posting supporting and increased Bids for several Mint State Walkers.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows, and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the *w*eek prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Over 100 Dealers Have Signed on With NCS.

Here are Just a Few Reasons Why...

"The Authority in Numismatic Conservation"

"**NCS offers services that are exactly what the coin industry and my clients have long been needing.** I have used NCS numerous times and have yet to be disappointed. My clients are thrilled that they can now have their collections properly conserved as needed and desired, thus maximizing the salability and value. I highly recommend them!"

Rick Tomaska

Before NCS

"A brilliant concept! My clients demand attractive coins. **By using NCS, I have converted many less attractive coins in my inventory into highly saleable items.** It is especially comforting to know that with NCS's grade protection option, I can eliminate most of the risk that I would have if I were to perform the necessary conservation techniques myself."

John Feigenbaum

After NCS

"A gaping hole in the coin business has been eliminated. **I have had one major collection conserved and many other single items from my inventory and the results have been astounding.** NCS helps me to keep more of the profits where I most need them, in the pockets of my clients."

Larry Hanks

"**I must admit my initial skepticism, but in seeing hundreds of NCS conserved coins I am 100% confident in the quality of their work.** My favorite aspect of this is that through NCS's affiliation with NGC, I can now, in one seamless effort, have my coins conserved, graded, and entered into the NGC registry."

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XVII No. 5 February 1, 2002 Single copy price $4.00

Sight-Unseen Market Very Active Proof Mercury Dimes In Demand

We have been writing for several months that the rare coin market has been under pressure, particularly on the supply side. Dealers continue to complain that not enough material is available to satisfy their needs. This situation has been exacerbated by the lack of fresh material available to fill growing customer want lists. Consequently, dealer frustration is mounting as seen on their faces following each coin show and public auction. We know that many attend these shows with the sole intent on buying, but time and again they return with the realization that they failed at realizing all their expectations. Therefore it should come as no surprise that increases are taking place in the **sight-unseen** market. Dealers know that it will take stronger Bids to have a chance at success. The drive to keep one's business successful is measured by the number of happy customers. And, a customer is not satisfied when too much time passes before his or her needs are met. So this week as we begin February, dealers must once again raise the ante in the hopes of shaking loose some coins that appear to be in very tight hands. Activity in the sight-unseen market is very brisk as we begin February. We are seeing strong interest in a number of areas. Plus signs are more evident this week with a few minus signs from the continued discounting of stale material.

Mint State Type is one area of the market that is facing this strong demand. This week, after several rounds of discounting to raise available funds, dealers are trying to buy Mint State Type for their customers and to replenish their inventories. Dealers are Bidding on specific areas that they believe are undervalued at the present time. Proof Type is also receiving some attention as well as some plus signs. Buffalo Nickels are no stranger to strong demand as you can see by our chart. This series has seen many months of plus signs and we see this trend continuing as we begin February. Again, Bidders are looking for the scarcer dates of the series in grades MS63 and better. Proof Singles are also very strong this week. Increases are seen for several denominations with the heaviest concentration targeting Dimes. See the tremendous 12 months percentage gains for Proof Mercury Dimes in the chart below. After a short hiatus, interest has once again appeared for the Gold Commemoratives. These issues performed super in 2001 and are now off to a good start in 2002. MS64 and MS65 definitely appears to be the grade of choice by dealers for several Gold Commem issues. Still, not all areas of the sight-unseen market are performing at peak levels. Weakness has been pervasive, hitting all the MS65 common dates of the Morgan Dollar series. The pop reports reinforce the extreme availability of these issues. It may take many more Dollar collectors to absorb this surplus. Better date Morgans are doing better than the common dates, even after some discounting. Even though no plus signs are seen, the GSA Carson City and non "CC" Dollar market remains strong. Currently, several dealers are willing to support these issues at present levels. Part of the fun of buying these Dollars involves the hunt for varieties. One east-coast dealer discovered the finest known Mint State example of an 1878-CC VAM 18. It is believed that only six are known to exist in Mint State and his prize, an MS63 DMPL has already been sold to a collector for $1,200.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MINT STATE TYPE COINS

Prices are for the most common dates. Better date coins usually bring more than the Bids of the most common issues listed herein.

Proof Singles Yield Explosive Increases Dollars Emerge From The Doldrums

We have written on several occasions that the supply side of the buying equation was tough for dealers. This situation has not as yet been resolved. The shortage of material available is continuing and dealers are still exploring all avenues at their disposal so they can buy rare coins for their customers. The expanding collector base is being blamed for this shortage, but this strong, fresh demand has also been a very welcome addition to the market. Fortunately, there isn't a shortage of coin shows and rare coin auctions. These events have helped to mitigate the situation somewhat but they haven't totally solved the problem.

More coins are needed to meet the demands of those quasi dealers selling Dollars on the Internet. These auctions have been placing coins with a new generation of collectors. That is one of the reasons why we are continuing to see strong dealer, sight-unseen Bids on the electronic dealer networks. Dealers are utilizing these systems trying to obtain material for their customers. They know that collectors have a natural proclivity towards Silver Dollars. This has been demonstrated over the years as collectors gravitate towards rare coins that have played a role in our American western history. They also appreciate coins that are large and display an attractive design. Morgan Dollars not only meet these requirements but offer a lot more. The challenge of obtaining key and semi-key dates is great within this series. That is why so many have gone on to built fabulous Dollar collections. Of course we know that many of the key players have left and prices have declined in recent months. We also know that the Dollar market has been lackluster, especially when it comes to the common dates. However check out this week's chart. Some dealers tell us that prices just got **too low** and have now become very attractive. Increased Bids are popping up all over the Morgan and Peace Dollar chart. Yes, even a few of the common dates are displaying plus signs. Dealers are buying MS63 and better common dates in quantity at current levels. Still, much of the excitement is retained for those Dollars that range from $250 and up. In one case, the **pop one** 1926-S Peace Dollar in MS67 is wanted at $27,500 sight-unseen. The 175 percent jump is real and not all that uncommon for pop one coins. Rarity remains desirable.

Proof Singles have been a stellar performer for quite some time now. Increases have been nearly a weekly occurrence with this segment of the market. There are many new collectors putting together modern sets and they are willing to buy quality examples at strong prices. Consequently, dealers have jumped on the opportunity to meet this demand. However, they are finding out that buying these coins is not as easy as just throwing a Bid out there. Supplies are limited and competition is keen so dealers are aggressively increasing their Bid trying to be successful. This week, plus signs are appearing throughout our Proof Singles chart for both PCGS and NGC certified coins. The percentage increases are astounding with many sporting double digit increases. Another handful is up approximately 50 percent. All denominations within the Proof Singles chart are participating in this increase. However, the largest proportion of Bids is targeting the Nickels, Quarters and Half Dollars. The 1936-1937 Buffalo Nickels; early Jefferson Nickels; early Washington Quarters; Walking Liberty Half Dollars; and, early Franklin Halves are badly needed by dealers. The number of coins demanded are heaviest for coins grading Proof 64 and better. Naturally these Proofs come very nice to begin with because they haven't been abused. Dealers know that Proofs with hairlines become even more magnified on the mirrored fields. That is why those that are graded Proof 63 and lower are less desirable.

Walking Liberty Half Dollars is another area of the market where dealers have increased their Bids. We see that the Bid increases range from 1 to 25 percent. In any case, dealers are looking to buy coins that represent an excellent value at current levels. So, that is why 25 percent increases and greater are readily seen for select rare coins. That's what has been happening for some time now and this trend is continuing in February.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

It makes no difference if your coins are certified or not. Your coins can be a collection, hoard, dealer inventory, investor lot, family estate, or any other type of property.

Here's what some of **Spectrum's** satisfied clients have to say: *This is just a note to say "thank you" for the prompt attention, courteous service, and fair prices I received for the sale of my collection. Mr. Thad Olson is extremely knowledgeable, and I felt at ease and quite confident in dealing with him. His offer was more than 20% higher than I received elsewhere, which was both a pleasant surprise and a wonderful bonus for dealing with your company. I would certainly recommend Spectrum to my friends and associates without reservation.*

I was very pleased with your offer. I also appreciated being spared the "critical analysis" most dealers feel they must go through before making an offer. I'm just sorry I didn't try your firm long ago. I'm convinced after my first sale to you that Spectrum is the place to go if you want honesty and fair dealing.

I have done business with Spectrum for the past eight years and every transaction has been totally satisfactory. Whether it was my most recent sale ($700) or the one in 1995 for over $100,000 (remember that one?) everyone has been friendly, professional, and fair.

Spectrum has a commitment to customer satisfaction that is unsurpassed in the rare coin industry. Let us help you to realize the most money for your coins. Give us an opportunity to serve you.

Sight-Unseen Market Exceptionally Strong Long Beach Expo Up Next

Dealers have a lot of decisions to make early in 2002. This is the time of year when market activity and travel are up and things are moving rather quickly. Dealers need to prioritize their needs so they can make the best use of their time. We know that finding fresh material for the strong collector demand is a priority for many dealers. That is the main reason why so many dealers remain optimistic about the future of the rare coin market. Dealers expect these current bullish trends to continue. They expect the expanding collector base to continue to grow in 2002. They can expect to see furious battles break-out at upcoming auctions. They know how strong the need is for original material and many dealers are willing to pay whatever it takes to be successful. Yes, this is the kind of rare coin market that is facing dealers in 2002. And, this is the way things will be until enough fresh material becomes available to satisfy the strong demand. In the meantime, dealers can only do the best they can, trying to buy coins that can be easily placed with their customers.

Many dealers will be in Southern California to attend the Long Beach Coin and Collectibles Expo February 21-24. Expectations are upbeat about this show and dealers are hopeful that it will provide them some of the coins they have been trying to find. Of course many are mainly interested in buying at the Long Beach Show but there are also quite a few dealers looking to sell recent deals and select inventory. One dealer has told us that a deal consisting of some outstanding 19th century coins has been selling rapidly. We are not surprised that word-of-mouth plays an important role in the close-knit dealer community, especially when it involves an important group of coins. It also helps when the coins are original and of nice quality. Along with doing the usual business on the Expo floor, dealers will be deluged with viewing thousands of auction lots. Several auction companies are conducting sales in California surrounding the Expo. Many hours are spent with auctions, but it can be time well spent if you are able to "rip" a coin or two. Aside from the show and auction circuit, dealers are keeping track of activities at home and on the electronic dealer trading networks.

The sight-unseen market is simply vibrant. Activity is up and so are Bids. The demand has filtered to nearly all segments of the market with plus signs predominating. The 2002 market to date is acting similarly to the beginning of the 2001 market. This is encouraging for those wanting a strong year. And so this week we find that the sight-unseen market is offering us yet another round of increases. We have recorded over 450 advancing Bids this week alone. In many cases the plus signs are appearing in the same familiar areas. Still, it is easy to understand that Bid needs to increase again because the demand wasn't satisfied after past increases. We know that dealers are always alert towards value. With this in mind, look at the **explosion** of **plus signs** appearing in the NGC Silver Commems chart. Dealers are especially looking to buy the MS63, MS64 and MS67 Commems. Morgan Dollars are generally higher despite the presence of a few dates being discounted. What is noteworthy about Dollars are the increases we see for MS67 generic issues. Also interest in DMPLs is forcing Bids higher for some select dates. Mixed activity is taking place for Mint State Gold Type. Plus signs are occurring for $20 Libs and Saints while minus signs are scattered in several denominations. Strong increases continue for No Motto and Motto Saints in MS66. They have advanced considerably during the past year as seen by our performance chart below. Proof Type is quiet with strong supporting Bids, as are Buffalo Nickels this week. The exception being the few plus signs for the key 3-Legged issue. Proof Singles and Walking Liberty Half Dollars have turned in another stellar performance this week. Dealers are still willing to up the ante for these popular issues. Consequently Bid has increased once again forcing many plus signs for the late-date Walkers and across many denominations of Proof Singles in PR63 thru PR67. Not much weakness to report although common date MS66 Standing Liberty Quarters dropped a bit.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

UNPRECEDENTED SIX-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the fourth edition of *The Coin Collector's Survival Manual*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- How to determine what a coin is worth and what grade the leading certification services would assign to it
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike
- **How lighting affects appearance—and the latest in halogen flashlights**
- Altered and counterfeit detection techniques
- How to judge price guide accuracy
- Selecting and testing a coin dealer

SPECIAL SECTIONS ON:

- **Doctored coins, how to detect them, and the case of the doctored hoard of gold rarities that got slabbed**
- The real truth about slab services "fixed grading standard" claims and premium quality coins
- Revelations from a leading coin trader
- **A grading service founder's startling admission of modified grading standards**
- The newest tax laws

- **How not to get ripped off if you buy coins through the mail or over the Internet**
- Profitable - and not-so-profitable - liquidation techniques
- **How to buy and sell at conventions like the pros do**
- How to spot a cleaned and artificially toned coin
- How to choose a non-destructive coin holder and safe—as well as the right storage method
- A review of some Internet web sites, with a legal analysis
- Requirements of the FTC telemarketing act
- The real facts behind the toning corrosion controversy

NEW information in the fourth edition:

- **Courageous information about on-line auctions—no other numismatic author has ever been as bold in exposing Internet scams!**
- A comparison of PCGS versus NGC—which service does the market really favor?
- Stunning exposé and bombshell interview on coin "doctoring"
- **Special full-color section on artificially toned and doctored coins**

and much, much more!

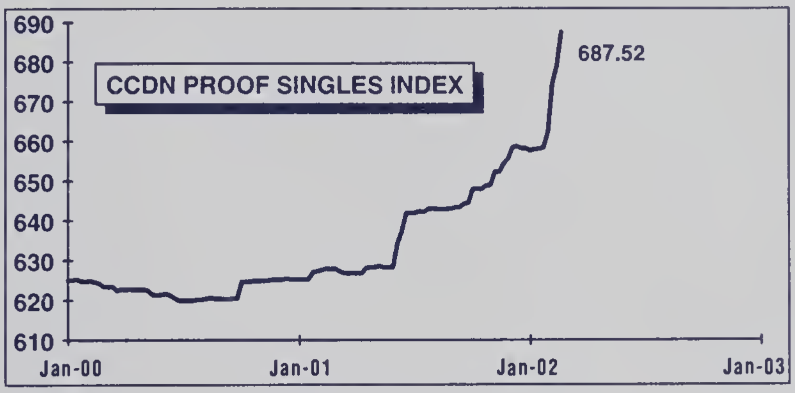
Buyers Need Deep Pockets At Long Beach Expo
Bids Explode At Two California Auctions

Many dealers have traveled to Southern California to attend the Long Beach Expo and public auctions that surround this important show. Early show reports from dealers depict a frenzied market. Deals have been brisk, taking place in hotel rooms even prior to the opening of the show. Those dealers looking to buy on the bourse are doing so with a vengeance. They are "loading up the truck" because they know that coins are readily selling to retail customers. Unfortunately, buying is extremely tough with holders of quality coins demanding top dollar.

Overall, this week in the sight-unseen market we see many strong, supporting Bids at current levels. Dealers are actively utilizing the sight-unseen network hoping to buy some coins and to fill some of their needs. The most outstanding performer that we see this week is for Proof Singles. This in not something new to regular readers as they know that the Proof Singles have been among the hottest areas of the sight-unseen market in 2002. This week dealers are desperately trying to buy examples from Lincoln Cents thru Walking Liberty Half Dollars. Strong Bids have forced prices higher for Proof Lincoln Cents; Buffalo Nickels; Jefferson Nickels; Washington Quarters; and, Walking Liberty Half Dollars. Buyers are mostiy looking for quality examples grading Proof 64 and higher. They are willing to buy PCGS and NGC examples, if they can get them. Silver Commemoratives are solid at current levels. However, we do see some minor discounting occurring in this segment of the market. We know that dealers are looking for Commems to fill orders that they have received. The demand has spread to many Mint State grades as the strong collector base is hungry for Uncirculated Commems. Noteworthy is the strong demand for Washington Carver PDS sets from 1951-1954. Dealers know how scarce these sets are at this grade level. Still, they have customers looking for these sets and they are trying to satisfy the demand. The Gold Commem market is steady at current levels. This is quite remarkable since it had a tremendous increase throughout 2001. Still, it has held most of its gains from last year. The market for generic Morgan Dollars is quite solid for examples in most Mint State grades. This is certainly a refreshing change for those that have suffered through the doldrums that this market endured over the last few years. Supporting Bids are seen for generic Morgans from MS63 thru MS67. The better dates of the series are holding near current levels with a few dates being discounted. Peace Dollars are generally steady with more dealers trying to buy examples at today's levels. Mint State Type is quiet although Bidders are eager to support current levels. A couple of discounts appear but these have been offset by a couple of increases. Mint State Gold Type is patiently waiting to see just which way bullion is headed. Until then, Bids are steady. Proof Type remains virtually unchanged although we see that at least one dealer has increased Bid for the Type I Buffalo Nickel Proof in PR64, PR65 and PR67. Regarding business strike Buffalo Nickels, we see that continued strong demand is still chasing a few of the keys. Bidders are looking for exceptional quality demanding MS65 and MS66 examples.



Superior conducted the Pre-Long Beach Sale on February 18-19 in Beverly Hills. The sale was highlighted by the C. Douglas Smith/Dr. Robert A. Schuman collection of 1802 Large Cents. These 17 coins alone realized $229,770. The sale totaled $1.3 million. A few highlights include an MS62 1802 Draped Bust Cent, S-242 at $32.200; a PCGS AU58 1796 Draped Bust Half Dime, LIKERTY brought $16,675; an NGC MS65 1815 Capped Bust Quarter claimed $10,350; an NGC MS67 1864-S Liberty Seated Half sold for $19,550; a PCGS MS67 1807 Capped Bust $5, Rev of 1808 realized $115,000; and, a PCGS MS61 1920-S $20 Saint-Gaudens brought $21,850.

The Benson II collection brought $6.1 million in Los Angeles February 18-19. It was conducted by Ira & Larry Goldberg C & C. We have listed a few of the highlights.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: **"w"** – Lowest asking price during the *w*eek prior to publication (*w*eek old); **"m"** – Lowest asking price during the previous three weeks (*m*onth old); **"t"** – *T*rade during the most recent month; **"lm"** – Lowest asking price appearing *l*ast *m*onth; **"lt"** *T*rade appearing *l*ast month; **"ot"** *T*rade older than 2 months; " " a blank, for all Market prices older than two months; **"a"** for auction transactions; **"oa"** – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Proof Gold, Proof Type and Proof Singles Lead Market
ANA National Money Show Eagerly Anticipated

This is a busy time in the rare coin market. Travel, shows and auctions dominate the schedule of many dealers. These events are important to dealers because they provide them the coins and contacts necessary to be successful. Building clientele is an important part of any business expansion process and the recently completed Long Beach Expo allowed dealers to be in touch with new collectors as well as revisiting with some dealer friends. However, their trip to Long Beach, for most dealers, was strictly about buying rare coins. Most attend this show carrying their customer want lists and a strong desire to make some inroads into this segment of their business. Yet, buying coins is more than just filling customer want lists. It is a knack for buying good value and doing so whenever the opportunity presents itself. Dealers attend these shows to be successful with the full knowledge that by completing just one or two deals will make their entire show a success. The same is true at public auctions. Dealers will spend a lot of time viewing many auction lots and than spend many hours at the auction waiting for their chance to capitalize on their hard work. However, the competition is stiff and coming out ahead in this market sometimes means being in the right place at the right time.

The sight-unseen market may play a role in the success of any dealer's daily routine. We continue to hear dealers telling us how pleased they are with their participation in the sight-unseen market. They are comfortable with leaving sight-unseen Bids up and when they are hit they are generally very pleased with the coins that they receive. We know that the demand for material is still very strong and the shortage that we wrote about continues to exist in this market. This was confirmed after speaking to a number of dealers in attendance at Long Beach. They are sure that it is getting tougher and tougher to buy rare coins. The prices that they need to pay are going higher and higher. Yet, they need these shows because that part of the market is very important to their bottom line at the end of the year. The same is true about the March 7-9 ANA National Money Show in Jacksonville, Florida which is the next major show. Dealers are hoping that the National Money Show will be as successful as the Long Beach Expo. It's easy to see that high expectations are already in place for this show.

The sight-unseen market is once again being dominated by Proof Singles. This week, as we have seen many times before, plus signs are scattered throughout our NGC and PCGS Proof Singles chart. Demand is spread across all five denominations from Cents thru Half Dollars. Increased Bids are heaviest for the early Proof coinage from 1936-1942. Quality is still very necessary to buyers as they are looking for coins grading Proof 64 and better. However, increases are also apparent for some PR63 Jefferson Nickels. Walking Liberty Half Dollars have seen some minor discounting this week. It is mainly for a few MS65 examples from the latter half of the series. Still, we know that this discounting doesn't take away from the general opinion and feeling that this series remains very strong. Buffalo Nickels is also a series that has been very strong and continues to do so. We see plus signs appearing for select dates grading MS65 and MS66. Again, Bidders are targeting the tough, better dates of the series. Until this demand is satisfied, it's likely that this activity will continue. Proof Type is doing very well this week despite a few discounts taking place. Proof 3-Cent Nickels; Liberty Seated Dimes, Quarters, Half Dollars and Dollars; Barber Quarters and Halves are needed by dealers. Increases are also seen for some Copper and Copper Nickel coins from Indian Cents and Lincoln Cents thru 2-Cent pieces. Finally Proof Gold came alive this week. This is an important sign that big money may be available to buy rare coins. Plus signs are heaviest for the $4 Stellas and $20 Liberty Gold. Again, dealers are looking to capitalize on what they deem to be under-priced issues representing good value. Commems and Dollars remain selectively strong. Dealers are looking for specific needs from each of these areas.

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the ***Sight-Unseen*** *certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XVII No. 10 March 8, 2002 Single copy price $4.00

Proof Singles Remain Super Strong Jacksonville Welcomes Buyers

With the ANA National Money Show in progress, the sight-unseen market is still responding favorably with plus signs appearing on a regular basis. The ANA show will allow dealers to try and buy the rare coins that they still need for their customers. It will also allow them to try to unload some of the material that has been gathering dust in their safes at home. If it is not possible to sell that unwanted material quickly than it just may become a ripe target for the electronic dealer networks. Often when dealers need to raise cash quickly for their certified rare coins it means hitting some sight-unseen Bids. Dealers are always looking to stay liquid in an active and volatile market such as the one we are experiencing at the present.

As we already stated, the sight-unseen market is continuing its bullish ways this week with several series and areas of the market benefiting from dealers Bids. Plus signs can be found in our Peace Dollar chart among others. This series doesn't get all the publicity that the Morgans do but it is popular with collectors. Dealers have customers working on complete sets and so they need to increase their Bid hoping to find some of the tougher dates in the MS63 and MS64 grades. Some of those dates being sough-after include 1924-S; 1927-D; 1927-S; and, 1928-S. Morgan Dollars are steady this week with plus signs appearing for a few select issues. We see that strong demand continues to put upward pressure on price for the 1903-O. This date is scarce in any grade and dealers need as many as they can find. The market for Mint State Type is doing OK. We see several dealers actively Bidding for MS Type at or near current levels. For example, strong supporting Bids are found for Barber Dimes, Quarters and Half Dollars in MS67. We see many strong Bids taking place at the MS66 and MS67 grade level. This may also be another sign of big money entering the market.

Take note that today's Bluesheet top performers are the same ones that we have been reporting over and over again. Once again we see that Buffalo Nickels, Walking Liberty Half Dollars and Proof Singles are dominating this market. Buffalo Nickels have already done well in 2002. Dealers need some of those difficult key and semi-key dates of the series and so they must continue to increase their Bids. The Buffalo Nickel series is extremely popular with many collector/investors. There are buyers waiting with cash but for the dealers the road isn't as easy. They know how tough it is to find some of these dates in these conditions and so they continue to resort to the sight-unseen and sight-seen markets trying to succeed. Jacksonville may be an importance source for them as well. Increases are also taking place for the early Matte Proof Buffalo Nickels. These jewels in Proof are usually easy sellers to collectors and dealers never seem to have enough of them on hand. The Walking Liberty Half Dollar series has been following a similar path as the Nickels. However, in this case the demand is very confined to the late dates of the series. This doesn't mean that the other dates have no demand, it just means that the demand forcing Bids higher is targeting the dates after 1940. Also, this specified demand is looking for coins of high quality grading MS65 thru MS67. At this grade level even the common dates of the series start getting difficult to find. Consequently, dealers need to work a little harder if they are to successfully capture some of these specimens. We certainly can't forget to mention about the strength of the Proof Singles segment of the market. This is arguably the strongest part of the market. Dealers have increased Bids for several denominations and grades for these Proof coins. This follows the strong unabated demand for modern coinage. Another natural from this area is the resurgence and continued growth of the Washington Quarter series. Dealers have increased their sight-unseen Bid for a few of the tough 1930s issues that collectors seek.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Buffaloes & Proof Type Take Spotlight Dealers Look Ahead To Baltimore

The ANA National Money Show in Jacksonville, Florida is now history and many dealers are keeping their bags packed as they head north to the Suburban Washington/Baltimore Annual Spring Coin & Currency Convention. The Wayne S. Rich collection auction will be conducted by Bowers and Merena in conjunction with the March 22-24 show. This Spring Baltimore show is usually good and is well attended by dealers. They know that the collector rich surrounding metropolitan area will be an excellent draw and could provide a great retail show. Still, they are always very ready to buy coins from each other prior to the opening of the show to the general public. Unfortunately the high expectations that many dealers experienced prior to the start of the ANA show never materialized. Most dealers that we spoke with were still able to make the best of the show by buying rare coins. Dealers reiterated the fact that they are having a lot of difficulty finding the necessary rare coins that they need for their customers. Key dates were mentioned time and again as dealers know that it takes key dates to satisfy many of their good customers. Unfortunately the availability of key dates today is few and far between. Those that have the key dates are not as willing to part with them, even when they are offered a solid profit. Most dealers know that replacing the coins in their inventories and finding the dates that their customers are clamoring for is getting more and more difficult. Dealers attend shows and auctions hoping to get that one big hit that makes his or her entire show. At shows, they are waiting for someone to approach them with a nice collection for sale. These collections may supply them with some of the coins they so desperately need. It also allows them to replenish some coins from their very depleted inventory while making contacts with potential new customers.

The strong demand for rare coins today has increased the Bidding activity that we see in the sight-unseen market. Dealers like to utilize this electronic medium as a way of buying and finding rare coins quickly. Along with the increase in Bidding activity we also have seen a slight increase in the number of trades taking place, both sight-seen and sight-unseen. On the sight-unseen side, dealers are buying Walking Liberty Half Dollars. We see many late date sales taking place in a range from $75 thru $800. Dealers are buying both NGC and PCGS examples grading MS65 thru MS67. Demand for Walkers continues to be extremely strong this year.

Buffalo Nickels are still making a strong statement. Sight-unseen Bids are still climbing with this week being the beneficiary of some rather hefty jumps. It's obvious that strong demand is fueling this market and the lack of available material is among the main reasons why Bids continue to go higher. The power that we see taking place is in the sheer number of increased Bids. Dealers are looking to buy nearly every date of the series in MS65. Sight-unseen Bid has increased for key dates and the common dates. Demand is targeting some MS66 and better Buffaloes as well. Proof Type is also getting some increased sight-unseen Bidding action this week. Increased Bids are seen for several denominations in grades ranging from PR63 thru PR67. Proof Liberty Seated Quarters and Half Dollars are on want lists. Proof Morgan Dollars also took a bit of a jump. Feeding off the demand for business strike Buffalo Nickels, the Type I 1913 Proof is higher in PR65 and better grades.

The balance of the sight-unseen market is steady with many supporting Bids and select increases taking place among Silver Commems, Morgan and Peace Dollars, Mint State Type and Proof Singles.

We have listed a few of the certified highlights from the Wayne S. Rich collection scheduled to take place in Baltimore March 21-23.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www cdnpublications com*

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Here's what some of **Spectrum's** satisfied clients have to say:

This is just a note to say "thank you" for the prompt attention, courteous service, and fair prices I received for the sale of my collection. Mr. Thad Olson is extremely knowledgeable, and I felt at ease and quite confident in dealing with him. His offer was more than 20% higher than I received elsewhere, which was both a pleasant surprise and a wonderful bonus for dealing with your company. I would certainly recommend Spectrum to my friends and associates without reservation.

I was very pleased with your offer. I also appreciated being spared the "critical analysis" most dealers feel they must go through before making an offer. I'm just sorry I didn't try your firm long ago. I'm convinced after my first sale to you that Spectrum is the place to go if you want honesty and fair dealing.

I have done business with Spectrum for the past eight years and every transaction has been totally satisfactory. Whether it was my most recent sale ($700) or the one in 1995 for over $100,000 (remember that one?) everyone has been friendly, professional, and fair.

Spectrum has a commitment to customer satisfaction that is unsurpassed in the rare coin industry. Let us help you to realize the most money for your coins. Give us an opportunity to serve you.

Market Separation Is More Defined Buying In Baltimore

Could the gap between the sight-unseen market and the sight-seen market be widening? We know that several dealers believe that a two tier market is in place. This has been a condition that dealers identified several years ago but they believe that it is becoming even more pronounced today. Dealers believe that this market is getting more polarized with a new group of sophisticated and knowledgeable collector/investors chasing super quality rare coins. These well-heeled buyers are willing to spend big money for coins that exhibit special qualities. They are willing to buy attractive rainbow toned coins for "stupid money" as one dealer phrased it. However finding this kind of material is far from easy. Dealers admit that it is getting more difficult to locate these coins for their customers but choose to attend the tough auction and coin show circuit to this end.

However, the demand for average quality and slightly below average quality rare coins is also increasing. Many of these rare coins reside in the *Bluesheet* arena. We have seen this increase in demand in repeated postings of increased sight-unseen Bids from many dealers. The avenues to market and sell these coins is also growing. The Internet, via auctions and web-sites has proved to be successful avenues traveled by many dealers. Still, other dealers choose to use the television and direct mail campaigns as a way of reaching a wider audience for their rare coins. These too have proved to be successful marketing vehicles continuing to create demand for rare coins. However, the recent surge in demand for premium quality coins and coins that exhibit strong eye appeal can not be denied. The super demand taking place for coins with original, not dipped surfaces is also evident. Included in this demand is the desire to buy attractively toned specimens of many denominations, including the modern Proof coins. At the same time we know that some discounting is continuing to take place in the sight-unseen market. Those coins that fail to measure the full premium quality designation are left to sell at whatever the market will bear. So we have some areas of the sight-unseen market increasing and other areas that are decreasing. Generally we see a wider gap developing between the sight-seen and the sight-unseen market. However both markets continue to be quite healthy. It is this upbeat market that dealers are experiencing right now in Baltimore. This usually well attended show is in full-swing with dealers actively trying to complete transactions.

This week we notice that a combination of discounting and increases are taking place in the sight-unseen market. The discounting is a function of quick sales of average quality to below average quality coins at recent public auctions. Dealers do this to raise funds so they can maintain a solid cash flow position. It also allows them to discard those coins that have stayed in their inventories for too long a time. Heavily and darkly toned coins are ripe for discounting. We have seen some of this discounting taking place in the Mint State and Proof Type charts. Still, strong supporting Bids are evident throughout the overall sight-unseen market with solid performances being seen in select areas. The *CCDN* Certified Coin Market Index graphs included this week picture some of those areas. Proof Singles is one of those areas that has done very well so far this year. We do notice that the number of plus signs is less than we have seen in previous weeks, with even a few minus signs beginning to appear. It would only be too natural to see some profit taking after the strong increase. Still there are many supporting Bids and strength being maintained in this segment of the market. Walking Liberty Half Dollars are doing well. Plus signs are evident for several late dates of the series. However even in this series some discounting is taking place. You just need to look at Proof Gold to see that overall demand is strong. One dealer has increased his **sight-unseen Bid** for the $4 Flowing Hair Stella in most grades. Several Buffalo Nickels continue to capture strong Bids within this increasingly popular series. Mercury Dimes have shown some discounting while Morgan Dollars are mixed. DMPL Morgans are realizing strong supporting Bids. Silver and Gold Commems are also showing evidence of both plus signs accompanied by some minus signs.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (month old); "**t**" – Trade during the most recent month; "**lm**" – Lowest asking price appearing last *month*; "**lt**" Trade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit, on a sight basis.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XVII No. 13 March 29, 2002 Single copy price $4.00

Mixed Market Ends First Quarter
Discounting Combines With Selective Demand

The sight-unseen market is mixed this week as we conclude the first quarter of 2002. This is evident because of the many minus signs appearing on our charts as a result of the discounting currently taking place. However, there is also strong demand from a powerful sight-seen market that is definitely influencing the sight-unseen rare coin market. The discounting is occurring in many of the higher grade portions of the market. Many of these discounted coins are a direct result of completed auctions. There have been quite of a few auctions held over the past few months. Each auction offers thousands of coins to the market at any given time. Sometimes, this surge of supply overwhelms the demand in the short run but it seems to be quickly absorbed in the weeks and months that follow. Why are the higher priced coins prone to this discounting? This is what we would expect to happen as dealers are more reluctant to aggressively Bid sight-unseen for higher priced rare coins. When a dealer is ready to buy a coin that trades above $5,000, he or she often wants to view the coin before making a binding decision. Also, when dealers need to raise money quickly to stay competitive for their customers, they usually are willing to "blow out" certain coins to make room for the in demand examples of the day. High price coins give them more bang for their buck. Still, there are some select issues that trade at the higher dollar levels that dealers have no problem Bidding on in the sight-unseen market.

However, we still see that the sight-unseen market is a vibrant one. Strong demand continues to force dealers to entertain this segment of the market hoping to buy badly needed coins for stock or for their customers. As we have written before, many dealers report that they have been pleasantly surprised by the coins that they have received sight-unseen. Sure, they will get a dog now and then but the overall picture is quite pleasant. Among the most popular issues, Morgan Dollars are realizing select increases for "CC" Mints in the sight-unseen market. Dealers seem to be chasing a few of the popular dates that are tough to find in the general market today. These are coins that dealers usually need for customers but also don't mind adding them to their inventories. Peace Dollars are quite healthy. We are seeing more supporting Bids for many of the dates in the series. Also, notice the jump in Bid for the 1927-D in MS66. This appears to be one of those exceptions that we alluded to earlier. Eight is the combined NGC and PCGS population for this issue in MS66 with none graded higher. Obviously, it is easy to see why extreme volatility has occurred. Otherwise, Walking Liberty Half Dollars, Proof Singles, Buffalo Nickels and Proof Type all seem to be attracting enough Bidders to remain in favor with today's collector/investors. Mint State Gold Type is also mixed. However, this particular segment could get an added boost if Gold bullion holds the $300 per ounce benchmark level it closed above during this writing.

The Bowers and Merena auction of the Wayne S. Rich collection depicted how strong the market is for premium quality coins and Paper Money. The $5.3 million realized for the sale eclipsed the earlier estimate by $1 million. We have listed a few of the many certified highlights from that auction.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Strong Sight-Unseen Bids Target MS66 Morgan Dollars Rise

Many dealers will be heading back to California to attend the April 12-14 show in Santa Clara. This show is usually a good retail show for dealers, but it will also be another opportunity for dealers to look at each other's inventory. Many transactions take place, dealer-to-dealer, just prior to the opening of all the major rare coin shows as well as the smaller, local shows.

The sight-unseen market remains mixed this week as we conclude the first week of April. Once again a bit of discounting is occurring on some of our charts. However strong demand for coins is dominating the sight-seen market and the carry over is sure having an effect on the sight-unseen market. What's different about this week's market is that the demand is getting even more selective and the Bidding increases are becoming more bold. Dealers are posting super strong Bids for coins that they have probably already sold. Of course, the problem is first finding these coins so that they can place them with their customers. Demand is still evident in the Buffalo Nickel series. Selectivity is at work in this series with plus signs appearing for a few semi-key and key dates in specific grades. The key, 1913-D Type 2 and semi-key, 1914-S are both receiving higher Bids in MS66. A jump of 19 percent, $500 to $3,100 Bid is in place for a 1934-D in MS66 as well. Dealers believe this coin to be undervalued. Our examples may indicate that there may be some serious collector/investors looking to buy high-grade Buffaloes. Some additional better dates in grades of MS64 are also in demand. The 1913-S Type I, 1913 Type 2, 1914-D and 1914-S increased this week. These are usually difficult to find dates for collector/investors, especially in MS64.

Common date, pre 1921 Morgans are slightly higher in MS65 and MS66 this week. However, the 1885 and 1885-O in MS66 were the beneficiary of very generous increases; 48 percent for the 1885-O and more than 20 percent for the Philadelphia. Also notice the increase for the common dates, 1883 and 1884 Carson City Dollars in MS66. Even though these are both common "CC" dates, it is still much more difficult to locate in MS66 compared to MS65. High grade Peace Dollars are also in demand these days. Two key dates were the target of solid increases. The 1921 jumped approximately 7.7 percent in MS66 to $4,200, while the 1934-S increased 4.35 percent to $2,400 in MS64. Again, quality is in demand and dealers are not shy when it comes to increasing a sight-unseen Bid when they know the coin already has a home.

Mercury Dimes are a series that hasn't dominated the market in recent years. However, we are beginning to notice some interesting activity that may be important. We see that some dealers are looking to buy a few, select better date Mercs. Strong supporting Bids are seen for several tough to find dates in MS65 FB. Some of these include the 1920-D; 1923-S; 1925-D; 1926-D; 1928-D; 1931-S; 1935-D; and, 1939-S. We also see strong supporting Bids for the two popular overdates, 1942/41 and 1942/41-D in MS65 and MS66. A few dates are even sporting plus signs. Consider the difficult to locate, 1945 Philadelphia issue in Full Split Bands. In MS66 FB, an $8,000 sight-unseen Bid was posted representing a 6.7 percent increase from the previous Bid. More spectacularly was the nearly 18 percent increase achieved by the 1930-S in the same grade. Obviously, dealers are trying to supply collectors with high quality coins of many series.

Classic Silver Commems are solid at current levels with some increases occurring. Gold Commems are slowing down with some discounting taking place this week. Discounting is also evident among select Mint State Type, Mint State Gold, and Proof Type. The bright spots for Type are the increases we see for the 1913 Type I Buffalo Nickels in PR65 to PR67 and the nearly 44 percent gain for 1883 No Cent Liberty Nickels in MS66. Walkers and Proof Singles are still doing well, but not as well as we have seen a few weeks ago. As Gold Bullion continues to improve, we are noticing that more Asks are being hit on the electronic dealer trading networks for common $20 Libs in low Mint State grades.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Carson City Morgans Dominate Dollar Demand Santa Clara May Provide Hope

Many dealers are already actively buying and selling coins at the April 12-14 Santa Clara show in California. This show couldn't have come at a better time because dealers still need plenty of coins for their customers and to fill their depleted inventories. The activity level at Santa Clara will depend on the availability of much needed fresh material as well as the public attendance. Dealers hope to capitalize on their opportunities. Collector attendance will probably be good because many people are now looking to add some Gold and Silver coins to their portfolios. Dealers tell us that when Spot crossed the $300 per ounce level for Gold things got a lot more active and interesting. Potential buyers continue to try to diversify their funds into the rare coin market as their remains a great deal of economic and political uncertainty today.

Morgan Dollars are probably the most popular and collected series of all U.S. coins. We know there are a lot of Lincoln Cent collectors and State Quarter collectors but when it comes to bread-and-butter numismatics, the Morgans hold a lot of fascination with many collectors. Like last week, the sight-unseen rare coin market continues to trade in a selective mode. That selectivity is quite obvious when you look at this week's Morgan Dollar chart for NGC and PCGS certified coins. When you examine the chart you should quickly notice that there are many plus signs occurring for Carson City issues. This is nothing new because we have been pointing out this demand quite often in 2002. This week you can see that dealers are looking to buy many "CC" dates in several grades. Demand for these cartwheels is great at the moment and dealers tell us that they can't seem to keep them in stock for any length of time. One dealer said that his inventory for even some of the common date "CC's" is at a very low level and he is having a great deal of difficulty increasing his supplies. Strong collector/investor demand is fueling this situation coupled with the increase in daily dealer-to-dealer trades. This situation is being further exacerbated because dealers want to buy all they can get at the current price. Specifically, they will buy General Services Administration "CC's" as well as certified, slabbed coins from NGC or PCGS. These bulk buyers are especially looking for certified, white coins that grade MS64 and MS65. Yet, astute dealers know that many PCGS and NGC MS64 and MS65 Dollars are found white and so they don't mind Bidding **sight-unseen** for these coins. They know that a few coins may not be readily salable but for the most part, they are happy with the coins they are receiving sight-unseen. Consequently, substantial increases are occurring for "CC" Dollars in these grades as seen by our chart below showing the top 20 performers since January. Scarce "CC" dates are in demand as well. The 1879-CC normal dies are needed in MS61 thru MS64. At the MS64 level the coin is still very affordable to collector/investors at just over $4,000, but the price becomes prohibitively harder to swallow at the next grade for all but the most wealthy collectors. Some increases also are found among some San Francisco, New Orleans and Philadelphia rarities.

Demand is still strong in the overall sight-unseen market with many supporting Bids in place. Buffalo Nickel increases have slowed down considerably, but we do see an occasional plus sign as select dates continue to be sought-after. The 1917-S and 1921-S are two semi-keys that are still on want lists. Silver Commems are also receiving Bid increases for select issues that are still in need. Demand is targeting high quality coins by looking for MS64 and better graded Commems. Peace Dollars have a similar scenario with increases taking place for select dates. Two keys are higher this week beginning with the popular 1921 in MS65 and MS66. Also we see another plus sign targeting the 1923-S, which is a difficult coin to find in MS65. Proof Singles are acting like the Buffaloes with fewer plus signs, however supporting demand is still very much evident. Minus signs are found among Gold Type, primarily in grades from MS63 thru MS65. Overall we see some discounting still taking place in the sight-unseen market, but even this has slowed down from previous weeks.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

UNPRECEDENTED SIX-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the fourth edition of *The Coin Collector's Survival Manual*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- How to determine what a coin is worth and what grade the leading certification services would assign to it
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike
- **How lighting affects appearance—and the latest in halogen flashlights**
- Altered and counterfeit detection techniques
- How to judge price guide accuracy
- Selecting and testing a coin dealer

SPECIAL SECTIONS ON:

- **Doctored coins, how to detect them, and the case of the doctored hoard of gold rarities that got slabbed**
- The real truth about slab services "fixed grading standard" claims and premium quality coins
- Revelations from a leading coin trader
- **A grading service founder's startling admission of modified grading standards**
- The newest tax laws

- **How not to get ripped off if you buy coins through the mail or over the Internet**
- Profitable - and not-so-profitable - liquidation techniques
- **How to buy and sell at conventions like the pros do**
- How to spot a cleaned and artificially toned coin
- How to choose a non-destructive coin holder and safe—as well as the right storage method
- A review of some Internet web sites, with a legal analysis
- Requirements of the FTC telemarketing act
- The real facts behind the toning corrosion controversy

NEW information in the fourth edition:

- **Courageous information about on-line auctions—no other numismatic author has ever been as bold in exposing Internet scams!**
- A comparison of PCGS versus NGC—which service does the market really favor?
- Stunning exposé and bombshell interview on coin "doctoring"
- **Special full-color section on artificially toned and doctored coins**

and much, much more!

Silver Commems Liven Up
Quality Still The Rage In This Market

Dealers that attended the Santa Clara show in California April 12-14 did so with the hopes of buying a lot of rare coins. Unfortunately for many dealers, the show did not produce the number and quality of coins that they had money earmarked to spend. The situation is growing more painful by the day with "huge" want lists spelling out the strong demand for coins by their customers. Still, most dealers that we speak to remain optimistic that the coins will begin appearing either at shows, public auctions or walk-ins off the street. The powerful demand that is evident for fresh material in the sight-seen market has had a **positive** affect on the **sight-unseen** market. Dealers using this avenue to buy coins have seen an increase in demand for coins that regularly trade in the sight-unseen market. Those dealers are becoming more competitive because they have had some measure of success utilizing this system, but also because they know that their inventories are getting too low. It takes money to make money and when you're in the rare coin business, it takes a sufficient supply of rare coins to complete a satisfactory number of transactions.

Strong demand is seen in several segments of the sight-unseen market this week. We begin with Morgan Dollars because that series is arguably among the hottest series in the entire market. Also, the portion of the Morgan Dollar series that is at the top is the Carson City Mint issues. We see that many supporting Bids are still appearing at today's higher levels. However, besides the supporting Bids we still see increasing Bids tendered for select "CC" dates. Demand is certainly targeting quality because plus signs are appearing for the 1883-CC and 1884-CC in the lofty grade of MS66. Strong dealer demand for these coins was witnessed at Santa Clara and now dealers are trying their luck in the sight-unseen market. Dollars are definitely strong, but it's not only the "CC" Mints that are enjoying plus signs. The 1885 Philadelphia and New Orleans Mints are higher in MS66 as well. Also, the DMPL's are very strong with many supporting Bids chasing the MS63 thru MS65 grades. Quality is also in demand in the Peace Dollar series. Notice that the key, 1921 increased an impressive 5 percent in MS66 and a strong supporting Bid is seen for the tough to find 1927-D in the same grade. Arguments about the hottest segment of the coin market may begin to favor the Commemorative sector. Silver Commems are realizing strong and numerous Bids this week from several dealers. Healthy percentage increases from 2% to 7% are found in the Commem series. Dealers are trying to place high quality Commems with their customers and so the increasing Bids are appearing in the MS65 and better grades. This makes perfect sense because even at these high grades dealers are able to buy coins that are priced affordable from $100 to $2,000. We also see some strength reappearing in the Gold Commems series. The 1922 Grant Memorial $1 jumped more than 20 percent to $7,450 Bid. Another rival for top series honors may be the Buffalo Nickels. Dealers are still increasing their Bids because the last round of increases failed to totally satisfy the demand. Even though this week's increases are relatively small, it's important to keep in mind that they are following many previous weeks and months of strong increases.

Other areas are also found to be selectively strong. Within Type, Liberty Seated Dimes with Legend increased 13 percent in MS66. And check out the Mercury Dimes this week! Yes, there are a few plus signs along with a few minus signs. What is significant about the plus signs is the fact that we are seeing them appear again. It has been quite some time since this segment of the market has been actively supported. A bit of weakness is found among Proof Type as Liberty Seated Dimes with Stars are down nearly 9 percent in Proof 65 and Copper-Nickel Indian Cents giving up 8 percent in Proof 66. All-in-all, we see a pretty healthy sight-unseen market.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Over 100 Dealers Have Signed on With NCS.

Here are Just a Few Reasons Why...

"The Authority in Numismatic Conservation"

"**NCS offers services that are exactly what the coin industry and my clients have long been needing.** I have used NCS numerous times and have yet to be disappointed. My clients are thrilled that they can now have their collections properly conserved as needed and desired, thus maximizing the salability and value. I highly recommend them!"

Rick Tomaska

Before NCS

"A brilliant concept! My clients demand attractive coins. **By using NCS, I have converted many less attractive coins in my inventory into highly saleable items.** It is especially comforting to know that with NCS's grade protection option, I can eliminate most of the risk that I would have if I were to perform the necessary conservation techniques myself."

John Feigenbaum

After NCS

"A gaping hole in the coin business has been eliminated. **I have had one major collection conserved and many other single items from my inventory and the results have been astounding.** NCS helps me to keep more of the profits where I most need them, in the pockets of my clients."

Larry Hanks

"**I must admit my initial skepticism, but in seeing hundreds of NCS conserved coins I am 100% confident in the quality of their work.** My favorite aspect of this is that through NCS's affiliation with NGC, I can now, in one seamless effort, have my coins conserved, graded, and entered into the NGC registry."

CSNS May Provide Some Relief

Proof $4 1879 Flowing Hair Stellas Jump In Six Grades

Dealers are optimistic that the Central States Numismatic Society's 63rd Anniversary Convention will provide them some much needed fresh material. The show is now in progress in Columbus, Ohio. The need for these premium quality coins with eye appeal has dealers willing to pay extremely strong money for those particular examples. It seems like everyone is on the same page these days making competition for those coins very heated and spirited. This is especially true at public auctions today. The Midwestern part of the country has a strong collector base and dealers are hopeful that increasing prices along with an increasing precious metals' market may spur some collector/investors to bring in material to sell. Of course it would also be nice if these same individuals were looking to buy rare coins at the show because dealers are never too busy to add a new customer. However, dealers know that their customer's want lists are still needing to be filled. Demand for select rare coins has been increasing and these specific needs are getting tougher to satisfy. The problem is that their inventory levels continue to decrease. Consequently, they need to buy coins to keep their business running at healthy levels.

The sight-unseen market is benefiting from the strong demand for coins that we see in the sight-seen market. When dealers have difficulty sprucing up their inventories or finding those tough dates, they will use any means necessary to solve the problem. It is obvious from the myriad of plus signs that are appearing on this week's *Bluesheet* and from the number of plus signs that we have seen in previous weeks that demand has yet to be satisfied. Dealers are battling very hard trying to buy coins. They hope that being the top sight-unseen Bidder, even if their Bid is the highest by just $1 or $2, will give them a leg up on their competition. So we are definitely seeing more activity in this market. Again, many of the same areas of the market that have been performing quite well are doing so again this week. Buffalo Nickels are still real hot. The Bidders are determined and hopeful that their new round of increased sight-unseen Bids will produce some coins. Quality is still a necessity as the majority of the plus signs are chasing grades from MS64 and better. Again, it's the rare dates that dealers are after because it's the rare dates that are on want lists. Mercury Dimes are also gaining some attention from dealers. Don't let the lack of plus signs on our Mercury Dime charts give you a false impression. Dealers are posting supporting Bids for many semi-key and key dates from this attractive series. We have noticed that the greatest need is targeting coins grading MS64 with Full Split Bands and for many "D" and "S" Mint Dimes in the teens, twenties and thirties.

Among Morgan Dollars, Carson City issues are following the strength that we have seen for several weeks now. At this time, dealers are trying to pick-up some of the scarcer "CC" dates along with common. The DMPL's and better dates are also in demand with trades occurring between Bid and Ask. Like the Mercury Dimes, Walking Liberty Half Dollars do not show a lot of plus signs but dealers are continuing to post supporting Bids for many dates of the series. This is especially true for those dates from 1941-47, even in MS66 and MS67 condition. Selective Bidding continues to dominate the Type charts. We see interest taking place for Shield Nickels in MS61 thru MS64; Barber Dimes in MS67; and Barber Quarters in MS67. Among Gold, Type III $20 Libs jumped 20 percent in MS65. Strong sight-unseen Bids are also taking place for NGC and PCGS Proof $4 Flowing Hair Stellas. Nice jumps are seen for all grades except Proof 67. This attractive and odd denomination has been a collector/investor favorite for many years. Liberty Nickels and Type I Buffalo Nickels are also higher among Proof Type. Silver Commemoratives are attracting considerable attention as well. Supporting Bids are seen throughout the series along with select increases. Gold Commems are steady at current levels. Dealers continue to retain many Commems on their want lists. Proof Singles are also solid with strong support offered for the 1936-37 Buffalo Nickels.

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the *w*eek prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Ups and Downs Characterize Sight-Unseen Market Buying Continues In Pennsylvania At PAN Show

Many dealers have returned home to sort through and organize their purchases from the Central States Numismatic Society Convention. The show, held in Columbus, Ohio April 25-28 was important as dealers tried to boost their depleted inventories while buying coins that have been on their customer's want lists for too long a time. Most of the dealers that we spoke to in Columbus said they were very satisfied with the show. Buying and selling was brisk from the outset as dealers tried to capitalize during the PNG Day held April 25. It is obvious that dealers are looking for coins that have a little pizzazz at each grade level. They tell us that their customers are getting more knowledgeable about grade and eye appeal. Today's serious buyers want quality and they are more than willing to pay the extra money it takes to own those coins. Yet, dealers also tell us that there is a huge emerging market of rare coin buyers that do business via the Internet and television. These dealers are also badly in need of material so shows such as the CSNS Convention help them to find and buy the material that will carry them for the next month or two. Consequently, strong buying activity at Central States was evident throughout the show's duration. This included the approximately $750,000 realized at the Heritage Bullet Auction held in conjunction with the show. This auction lists only certified coins. Of course, dealers weren't able to have their needs completely satisfied but many were able to buy coins and return home after a successful show. We also know that a lot of the dealers will keep their bags packed and head up the road out of Columbus heading east towards Pittsburgh. They will be attending the Pennsylvania Association of Numismatists Annual Spring Coin Show May 3-5. This show, in Monroeville will allow them to have another chance at buying some coins at the higher price levels. Dealers know that it takes aggressive Bidding to be successful when Bidding on coins that have a considerable amount of eye appeal and luster.

The sight-unseen market is still benefiting from the strong demand that we are seeing in the sight-seen market. Discounting is taking place again as recent auction results get processed. In some cases, "ugly" coins are being allowed to sell at reduced levels driving down sight-unseen Bids. However, it is also fair to say that overall demand in the sight-unseen market continues to be rather impressive despite the discounting. Many areas that have been doing well throughout 2002 are continuing to do so this week. Let's recap some of the highlights of the sight-unseen market. Morgan Dollars are receiving steady supporting Bids for many of the generic dates in all grades. Meanwhile, the "CC" Mints continue to find Bid increases as demand grows, especially in MS64. Increasing Bids are also seen for GSA "CC" Dollars. Likewise, select "non-CC" dates are also increasing, such as the 1879, 1900-S, 1902-S, 1903-O and 1921-D. Discounting is evident within the Dollar series with some steep declines that are a direct result of recent auction prices realized. Mint State and Proof Type have continued to gain the attention of collector/investors. Dealers are always looking to buy Type when they can. This week, Capped Bust Half Dimes are realizing a higher Bid in MS65. Meanwhile, Mint State Gold Type is benefiting from a higher Gold Spot as the $20 Liberty Type III and Saint-Gaudens issues are higher in MS62 and MS63. We also see the Saints higher in MS64-MS66 as well. Classic Silver Commems are still attracting a lot of Bidders. Quality is important as slight increases are occurring for the MS67 California, Delaware and Spanish Trail issues. Gold Commems are steady at current levels. Buffalo Nickels are still the rage with Bidders lifting Bids higher for select dates in MS65 and better condition. Walking Liberty Half Dollars are still sought-after with dealers increasing Bid for a few late issues of the series in MS67. Proof Singles are quiet compared to what we've been used to but we are still able to find some plus signs on our charts.

CERTIFIED COIN DEALER newsletter

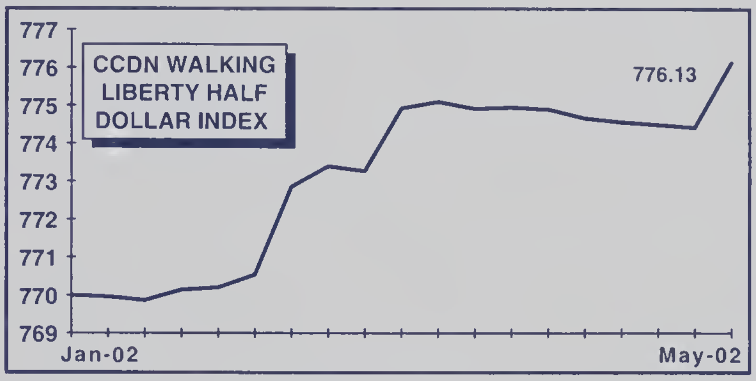
Sight-Unseen Market Active Walking Liberty Half Dollars Lead

Trading this week and this month in the financial markets has been extremely volatile. We see this in our equity markets on Wall Street, where sharp declines one day are followed by sharp increases the next only to have this cycle repeated. The precious metal's market, while enjoying a bullish trend is not totally immune from this extreme volatility. Still, analysts say that the trend is higher with Gold Spot able to stay solidly above the $300 per ounce benchmark. The rare coin market, which has always been known for its volatility has also been quite active. Extreme volatility is a sign of instability from very nervous investors and collector/investors. Many individuals have seen large sums of money, on paper, vanish. They are concerned with the problems that face their day-to-day lives. The economy and the problems that have come as a result of our war on terrorism are high on their list. A flight to security by many includes adding some rare coins to their portfolios. To this end dealers have been facing sharp demand for coins. Unfortunately, the supply of rare coins has been unable to keep pace with demand. This situation has triggered more volatility in the market as dealers try to increase Bid, sometime sharply to be able to satisfy their collector/investor's demand. Many dealers will also try to buy coins when they attend the Arizona Coin Expo May 16-18 in Phoenix. Dealer set-up is scheduled on May 15.



The sight-unseen market is taking its direction from the sight-seen market. We have seen select areas of the market experiencing strong demand and dealers are willing to explore all avenues at their disposal in order to buy the coins that they need for their customers. Bidding in this week's sight-unseen market has been active and brisk. Many areas are being targeted with Bids increasing throughout our sheets. Morgan Dollars, Peace Dollars, Mint State and Proof Type, Walking Liberty Half Dollars and Silver Commemoratives are all realizing sharp increases for select issues. It is important to keep in mind that even a one percent increase for the week is considered to be a strong move. Those dealers increasing Bid for Commems are looking for high quality. You will notice from both the NGC and PCGS charts that MS66 and better Commems are preferred. Strong interest is definitely chasing the B. T. Washington and Washington/Carver PDS sets. These sets have been in demand for some time with few available on the market. As a series, the Morgan Dollars are attracting many Bids. Dealers are still looking for those "CC" Mints, but there are other dates needed as well. Strong demand is also seen for many DMPL and Prooflike examples. Dollar specialists believe that select DMPL and PL Morgans are seriously undervalued. Peace Dollars are also more active these days with higher Bids in place. We see 10 percent and greater gains for the 1922-D and 1923-S issues in MS63 for NGC and PCGS. Strong Bidding has also begun in the Mint State Type area. Dealers are carefully selecting specific dates while increasing Bid by up to 30 percent and more in some cases. For example, NGC MS65 1883 Liberty Nickels, No Cents increased 31 percent to $170 Bid. Mint State Gold is mixed, but with a definite upside bias. That's because most collector/investors believe that a bull market is in place for Gold. Proof Type also turned in some gains this week although most of those gains were small. Still, dealers are looking for high quality PR65 and better Type when they can find it. The Walking Liberty Half Dollar series has many plus signs appearing in Mint State grades of 65, 66 and 67. We are not surprised that Walkers are increasing but we are surprised by the strong, double digit percentage gains. This series was hot earlier this year and is now beginning to heat up again as dealers push sight-unseen Bids higher. A jump of 28 percent took place for the 1947 in NGC MS67 condition. The PCGS example also had a strong increase for that date and grade at 7.14 percent. Proof Singles continue their demand with select increases, rounding out a generally strong overall sight-unseen market.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity [illegible] nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com
